

Blocks & Sleeves

Road Milling System

Benefits

Superior Wear Resistance

Heavy duty design

Enhanced Material Flow

Smooth angles reduce drag and vibration

Weld Friendly

Generous weld bevels

Less Downtime

Longer performance life

Easy Removal & Replacement

Designed with field conditions in mind

Technical

Our one-piece design eliminates a point of failure by combining the pedestal and block. We've resolved the need for both a right and left hand block. Our single system can operate as either and reduces inventory needs. Our back angle cut allows for easy access bit removal. For easy field installation, the front and back angle cuts are matched, ensuring easy alignment and proper skew.
