

Prime-Arc™

Welding consumables

Prime-Arc™ welding consumables are designed to provide our customers with the highest quality hard surfacing, build-up and joining products in the industry.

More than 35 years of welding and fabrication experience has enabled us to develop a unique product line that provides extended service life while reducing costly downtime.

Joining

Prime-Arc™ joining electrodes and wires are formulated with field conditions in mind. Designed to join high-strength abrasion-resistant steel, manganese steel and dissimilar metals.

Hard Surfacing

Whatever you wear problem, there's a Prime-Arc™ wire designed for your needs. We have a full line of chromium carbide, complex carbide, tungsten carbide, manganese, martensitic and tool steel consumables that can handle rock, earthmoving, metal-to-metal and other demanding applications.

Build-Up

Re-built parts often exceed OEM specifications for service life. Prime-Arc™ build-up consumables are used for repairing and resurfacing expensive, worn parts.

Tubular

Our unique tubular hard surfacing rods provide extremely high deposition rates and are available in a variety of chromium and
